# **DECOMPOSERS**

#### **Next Generation Science Standards**

### Standard: K-ESS3 Earth and Human Activity

• K-ESS3-1. Use a model to represent the relationship between the needs of different plants or animals (including humans) and the places they live.

#### Standard: 1-LS1 From Molecules to Organisms: Structures and Processes

• 1-LS1-1. Use materials to design a solution to a human problem by mimicking how plants and/or animals use their external parts to help them survive, grow, and meet their needs.

# Standard: 2-LS4 Biological Evolution: Unity and Diversity

• 2-LS4-1. Make observations of plants and animals to compare the diversity of life in different habitats.

### Standard: 3-LS4 Biological Evolution: Unity and Diversity

• 3-LS4-3. Construct an argument with evidence that in a particular habitat some organisms can survive well, some survive less well, and some cannot survive at all.

# Standard: 4-LS1 From Molecules to Organisms: Structures and Processes

• 4-LS1-1. Construct an argument that plants and animals have internal and external structures that function to support survival, growth, behavior, and reproduction.

# Standard: 5-LS2 Ecosystems: Interactions, Energy, and Dynamics

• 5-LS2-1. Develop a model to describe the movement of matter among plants, animals, decomposers, and the environment.

## Standard: MS-LS2 Ecosystems: Interactions, Energy, and Dynamics

- MS-LS2-1. Analyze and interpret data to provide evidence for the effects of resource availability on organisms and populations of organisms in an ecosystem.
- MS-LS2-2. Construct an explanation that predicts patterns of interactions among organisms across multiple ecosystems.
- MS-LS2-4. Construct an argument supported by empirical evidence that changes to physical or biological components of an ecosystem affect populations.
